

GRADUATE CERTIFICATE IN DIGITAL LITERACIES

Program Description

Given the implications of current policy and technology in education, this certificate will provide coursework that allows participants to examine the role of digital literacy in education through the evaluation of digital literacies, their politics, problems, and possibilities, and will enable a deeper understanding of ways to incorporate digital literacies into curricula. Educators will gain a richer conceptualization of digital literacies and their place in twenty-first century education, in addition to understanding ways to apply appropriate programs and applications to their current teaching practices.
