

# GEOGRAPHY (GEOG)

---

## **GEOG 1321. People, Place and the Envrnmt. 3 Hours.**

The basic concepts of meteorology and climatology are introduced. Atmospheric temperature, pressure, winds, moisture, and air masses and storms are systematically covered, followed by an overview of the major climates and ecosystems of the earth. Environmental problems related to weather, climate, and ecosystems are considered throughout.

## **GEOG 1401. Weather and Climate. 4 Hours.**

The basic concepts of meteorology and climatology are introduced. Atmospheric temperature, pressure, winds, moisture, and air masses and storms are systematically covered, followed by an overview of the major climates and ecosystems of the earth. Environmental problems related to weather, climate, and ecosystems are considered throughout. The lab portion of weather and climate is an activity-related treatment of the basic components of meteorology and climatology. Specific topics covered are similar to the lecture.

## **GEOG 2301. Environmental Geography. 3 Hours.**

Environmental Geography is a study of the spatial dimensions of the interaction between humans and their physical environment. Key principles of how the earth and the earth's ecosystems work, how they are interconnected, and how humans use and impact these natural resource systems will be introduced.

## **GEOG 2355. World Reg Geo-Eur Asia Aust. 3 Hours.**

An introductory level course giving a general overview of the land and people. Topics discussed will include the physical environment, cultural characteristics and the various ways people live and make their living. Attention will be focused upon the relationships which exist between location, the physical environment and human activity. Examples of countries covered are Russia, Germany, France, China, Japan, and United Kingdom.

## **GEOG 2356. Reg Geo-Lat Am Africa So Asia. 3 Hours.**

An introductory level course giving a general overview of the land and people. Topics discussed will include the physical environment, cultural characteristics and the various ways people live and make their living. Attention will be focused upon the relationships which exist between location, the physical environment and human activity. Examples of countries covered are Mexico, Brazil, Argentina, Egypt, Republic of South Africa, Israel, Iran, and India. Writing enhanced.

## **GEOG 2364. Geo-Spatial Technology. 3 Hours.**

An introduction to technologies, such as geographic information systems (GIS) and global positioning systems (GPS), that are used to map and study the Earth. The emphasis is on the application of these technologies in areas of environmental and natural resources management, business and marketing, and law enforcement and national security.

## **GEOG 2464. Intro to Geographic Info Sys. 4 Hours.**

This course will introduce basics of geographic information systems (GIS) with an emphasis on environmental and resource management applications. Students will design and develop a digital spatial database, perform spatial analyses, create hardcopy maps, and generate reports. Students will be introduced to several GIS software packages. This course does incorporate a laboratory component. Writing enhanced.

## **GEOG 3350. Cultural Geography. 3 Hours.**

This course focuses on the concept of culture from a spatial or geographical perspective, examining culture as it relates to the geographic landscape. Topics include the spatial dynamics of language, religion, race, ethnicity, music, sport, folk and popular cultures, and the built environment. The course also provides an examination of symbolic landscapes, contested spaces, subaltern geographies, representations of place in film and literature, gendered spaces, and place-situated identities.

## **GEOG 3352. Tourism Geography. 3 Hours.**

Provides an introduction to the geography of tourism. Topics include the historical development of travel and tourism, place promotion, location of tourism destinations, geographic resources of tourism, and the physical and social outcomes of tourism.

**Prerequisite:** GEOG 1321 or GEOG 2355 or GEOG 2356.

## **GEOG 3358. Historcl Geog Of United States. 3 Hours.**

A survey of the changing geography of the United States including initial exploration, European perception of North America, geographical expansion of the United States to the Pacific, and geographical factors underlying the urbanization and industrialization of the nation. Writing enhanced.

## **GEOG 3359. Regional Geography:Us & Canada. 3 Hours.**

This course provides a general overview of the land and people of the United States and Canada. Topics covered include the physical environment (weather patterns, landforms and water resources), cultural differences, and the various ways people live and make their living. Attention is focused upon the relationships which exist between location, the physical environment and human activity. This course is available on-line and via traditional classroom delivery. Traditional classroom sections are writing enhanced.

## **GEOG 3362. Map Use & Map Interpretation. 3 Hours.**

This course teaches students how to use and interpret topographic maps and helps them to develop an appreciation of their use as tools by geographers. It familiarizes students with map projections and their limitations, various coordinate systems, map measurements, GPS, and the basics of air photo interpretation.

**GEOG 3363. Computer Cartography. 3 Hours.**

Fundamentals of thematic mapping, including appropriate usage, projections, base-map compilation, data measurement and analysis, map design and construction, color principles, and other cartographic concepts will be emphasized.

**Prerequisite:** GEOG 2464.

**GEOG 4075. Readings in Geography. 1-3 Hours.**

A course designed specifically for advanced students of geography who are capable of independent study. Registration is permitted only upon approval of the program coordinator. This course may be taken for Academic Distinction credit. See Academic Distinction Program in this catalog.

Writing enhanced. Variable Credit (1-3).

**GEOG 4331. Conservatn Of Naturl Resources. 3 Hours.**

This course stresses the impact of human activities on the natural world, environmental protection, and the wise use of the earth's resources. Topics include: environmental history, economics, law and ethics, ecology, population issues, agriculture and grazing, soil conservation, forestry, endangered and exotic species, water availability and water pollution, hazardous and solid waste management, air pollution (including global warming), energy resources (fossil, nuclear, and renewable), and the impact of technology on the future health of the planet.

**GEOG 4333. Field Studies. 3 Hours.**

Use of geospatial technologies such as Global Positioning Systems (GPS), laser surveying, digital aerial photography and computerized mapping (GIS) will be stressed. Applications of these technologies will include surveying, water resources, forestry, soil science, wetlands delineation, urban and transportation planning, automobile accident reconstruction and crime scene evidence recovery. Half of the class meetings will take place at a variety of outdoor locations.

**GEOG 4351. Economic Geography. 3 Hours.**

An examination of the importance of location to human activity. The locational characteristics of primary, secondary, and tertiary economic activities are examined, with an emphasis on land use and urban form, its theory, and descriptive analysis, as well as an explanation of market forces and their consequences. Writing enhanced.

**GEOG 4356. Urban Geography. 3 Hours.**

This course will introduce the scope and nature of urban areas from a geographical or spatial perspective. The course will focus on the spatial structure of urban areas and will examine the geography of cities using an urban systems approach. Emphasis will be placed on the North American city and its problems: land use, transportation, political fragmentation, physical environment, demographic and social change, economic dynamics, residential patterns, urban culture, poverty, etc. Trends in urbanization in both developed and developing worlds will be discussed. Writing enhanced.

**Prerequisite:** GEOG 1321 or GEOG 2355 or GEOG 2356.

**GEOG 4357. Population Geography. 3 Hours.**

Population geography examines spatial patterns and processes influencing the distribution, density, composition, and growth in human populations. The course will focus on migration, and to a lesser extent on fertility and mortality together with socio-economic, political, and environmental causes and consequences of population dynamics that vary between regions and over time. Writing enhanced.

**Prerequisite:** GEOG 1321 or GEOG 2355 or GEOG 2356.

**GEOG 4358. Geography Of Texas. 3 Hours.**

A survey of the regional geography of Texas. Consideration is given to the significance of primary and secondary activity within the state, urbanization, and potential for development.

**GEOG 4359. Transportation Geography. 3 Hours.**

This course introduces the concepts, theories, and methods of transportation geography. It covers transportation infrastructure, modes of terminals, transportation economics, urban transportation, logistics, and transportation planning. In addition, this course covers various analytical techniques applied in transportation analysis, such as network analysis, gravity models, location-allocation modeling, and geographic information systems in transportation studies.

**Prerequisite:** GEOG 1321 or permission of instructor.

**GEOG 4360. Cultural Field Study. 3 Hours.**

This course focuses on a number of topics and concepts that fall within the sub-discipline of cultural geography. Students engage in place-based learning, with the primary emphasis being a field experience that directly exposes students to processes and concepts introduced and discussed in the classroom. These include migration, urbanization, economic transformations, demographic change, social and technological change, racial segregation, civil rights, heritage tourism and other topics. Writing enhanced.

**Prerequisite:** 6 GEOG advanced hours or permission of Instructor.

**GEOG 4361. Geographic Information Systems for Public Health. 3 Hours.**

This course covers the theory and application of Geographic Information Systems (GIS) for public health. It includes an overview of the principles of GIS in public health and practical experience in its use. In addition, it covers the application of GIS mapping and analyzing the geographic distribution of populations at risk and health outcomes. The practical component involves the use of desktop GIS software packages.

**Prerequisite:** GEOG 2464 or HLTH 3350 or HLTH 3360.

**GEOG 4365. Applied Geographic Info Systms. 3 Hours.**

Applied GIS is designed to meet the needs for a highly applied course with realistic practical training extending the fundamental principles learned in Introduction to Geographic Information Systems (GEOG 2464). The application of GIS technology to mapping, modeling and management of large data bases will be emphasized. Writing enhanced.

**Prerequisite:** GEOG 2464.

**GEOG 4432. Geomorphology. 4 Hours.**

This course focuses on surficial geological processes and the resulting landforms. Specific topics include landscape processes associated with streams, glaciers, wind, coasts, mass wasting, weathering and soil development, and geologic structure. Labs emphasize landform analysis through interpretation of topographic maps and aerial photos. Writing enhanced. Two-hour laboratory.

**Prerequisite:** GEOL 1303.

**GEOG 4468. Remote Sensing. 4 Hours.**

This course introduces students to the methods used to analyze and interpret aerial photography and satellite imagery. Emphasis is placed on multispectral satellite imagery, digital image processing, and land use and land cover analysis using remotely sensed imagery. Lab included.
