

BACHELOR OF SCIENCE, MAJOR IN COMPOSITE SCIENCE

This degree is housed in several departments and will enable you to teach Biology, Chemistry, Geography and Geology (i.e., Earth Science), and Physics (including astronomy). Because individuals who have this certification can teach several disciplines of science, *they are especially sought after by schools*. This degree combines core science coursework with the Secondary Education certification. It also allows students to focus in an area of science that interests them. Accordingly, after having completed the common core of science classes, students then focus their remaining coursework in an area of particular interest to them, such as chemistry or geology. Because this degree encompasses several science certifications, it requires 124-129 hours of coursework, depending upon the area of specialization. Below is a summary of the Composite Science degree requirements.
