

CHEMISTRY (CHEM)

CHEM 1105. Chemistry in Context Lab. 1 Hour.

Laboratory for CHEM 1305. Concurrent enrollment in CHEM 1305 is recommended.

CHEM 1305. Applying Chemistry to Society. 3 Hours.

Chemical phenomena, concepts and principles are explored within the context of the role of science and technology in society. A life-centered approach rather than a subject-centered one has been employed in the development of course curriculum. This course is specifically designed to satisfy the natural science core requirement of students who are not specializing in science. Concurrent enrollment in CHEM 1105 is recommended.

CHEM 1406. Inorganic & Envir Chemistry. 4 Hours.

The elements and their compounds are considered from a non-technical standpoint with emphasis placed on more familiar materials. Two-hour laboratory. This course is for non-science majors.

CHEM 1407. Intro Organic and Biochemistry. 4 Hours.

An orientation in organic chemistry is given in the first part of the course to allow treatment of the chemistry of nutrition and other biochemical aspects given in the last part. Two-hour laboratory. This course is for non-science majors.

Prerequisite: CHEM 1406, CHEM 1411, or completion of a high school chemistry course.

CHEM 1411. General Chemistry I. 4 Hours.

The following topics are studied: chemical changes and laws governing them; nomenclature; introduction to thermodynamics; reactions involving oxygen, hydrogen, acids, bases, and salts; ionization; metathesis; the periodic table, and atomic and molecular structure. Three-hour laboratory. This course is for chemistry and other science majors. Fall, Spring, Summer I.

Prerequisite: Minimum grade of C in MATH 1410, MATH 1314, MATH 1324 or MATH 2384 or equivalent, or a minimum Math score of 23 on the ACT or 560 on the SAT (580 on new SAT) or equivalent.

CHEM 1412. General Chemistry II. 4 Hours.

Descriptive chemistry, gas laws, equilibria, kinetics, thermodynamics, electrochemistry, and oxidation-reduction reactions are presented. Three-hour laboratory. Fall, Spring, Summer II.

Prerequisite: A minimum grade of C in CHEM 1411.

CHEM 2123. Organic Chemistry I Lab. 1 Hour.

Laboratory for CHEM 2323. Fall, Spring, Summer I.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, and prior credit for or concurrent enrollment in CHEM 2323.

CHEM 2125. Organic Chemistry II: Lab. 1 Hour.

Laboratory for CHEM 2325. Fall, Spring, Summer II.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2123, CHEM 2323, and prior credit for or concurrent enrollment in CHEM 2325.

CHEM 2323. Organic Chemistry I: Lecture. 3 Hours.

A study of chemical bonding and structure of organic molecules is made. Functional group reactions and syntheses are emphasized. Reaction mechanisms, nomenclature and isomerism are studied. Fall, Spring, Summer I.

Prerequisite: A minimum grade of C in CHEM 1411 and CHEM 1412.

CHEM 2325. Organic Chemistry II: Lecture. 3 Hours.

The general plan of CHEM 2323 is continued. Fall, Spring, Summer II.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, and CHEM 2123.

CHEM 2401. Quantitative Analysis. 4 Hours.

The fundamental principles of quantitative analysis are emphasized. Acid-base, complexometric, precipitation, and redox titrations, solution equilibria and spectrophotometric analysis are discussed. Laboratory exercises involve all types of volumetric procedures and colorimetric analysis. Four-hour laboratory. Fall, Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412.

CHEM 3339. Biochemistry II. 3 Hours.

This course is a study of the bioenergetics associated with the metabolic pathways and processes. The metabolism of carbohydrates, lipids, proteins, and nucleic acids; the interrelationship of the metabolic pathways; and the regulation of metabolism are emphasized. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125 and CHEM 3438.

CHEM 3361. Discoveries In Chm & Textiles. 3 Hours.

Attention will be focused on early scientists, the times in which they worked, important aspects of their efforts, and how their research continues to impact us today. Lectures will occur in the geographical areas where their work took place. Odd years during the Spring/Summer I break.

Prerequisite: CHEM 1406 or CHEM 1411, junior standing, and permission of the instructor.

CHEM 3367. Intro Inorganic Chemistry. 3 Hours.

General principles of inorganic chemistry are presented with a descriptive and practical rather than mathematical approach. Periodic relationships of elements and bonding, reactions and synthesis of inorganic compounds, acid-base chemistry are studied. Fall.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323.

CHEM 3368. Environmental Chemistry. 3 Hours.

The chemical principles underlying the effects of air, water, and soil pollution are covered. Specific attention is paid to gas phase radical reactions, light absorption characteristics of atmospheric components, solution chemistry of fresh and salt water systems, and the mobility and chemistry of metal components of soil systems. Spring even years.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2401, CHEM 2323 and CHEM 2325 (or concurrent enrollment in CHEM 2325).

CHEM 3438. Biochemistry I. 4 Hours.

The chemistry and functions of carbohydrates, lipids, proteins, enzymes, nucleic acids and vitamins; enzyme kinetics; the processes of and mechanisms of digestion and absorption; and biological buffers are studied. Four-hour laboratory. Fall, Summer.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125.

CHEM 4001. Directed Study In Chemistry. 1 Hour.

A directed study for undergraduates. This course is designed to allow independent study by advanced students. Instruction is on an individual basis. Variable Credit (1-3).

Prerequisite: A minimum grade of C in CHEM 2325 and approval of department chair.

CHEM 4100. Chemical Literature Seminar. 1 Hour.

Methods of searching the literature in chemistry are presented. Emphasis is placed on the use of Chemical Abstracts, Beilstein, chemical patent literature, journals, and reference collections in the several specialties of chemistry. Fall, Spring.

Prerequisite: Junior standing in chemistry.

CHEM 4260. Advanced Integrated Laboratory. 2 Hours.

This course will involve in-depth experiments that require the use of sophisticated synthetic and analytical procedures in the areas of organic, inorganic or analytical chemistry. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4448.

CHEM 4367. Advanced Inorganic Chemistry. 3 Hours.

Properties of atoms and ions, bonding theory and structure, acid-base theory, reactions of inorganic compounds, nonaqueous solvents, and coordination chemistry are studied. Emphasis is on the underlying theoretical concepts involved. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4448.

CHEM 4380. Forensic Chemistry. 3 Hours.

This is a one semester course focused on surveying important aspects of chemistry to forensic inquiries. Focus will be on the validity of results. Techniques and methods for selecting proper techniques to answer various questions will be discussed. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4440 and CHEM 4367 (or concurrent enrollment in CHEM 4367); MATH 1420.

CHEM 4395. Undergrad Research In Chem. 3 Hours.

This course acquaints the senior student with techniques used in simple research problems. May be repeated for an additional three semester hours by those students having a definite project to complete. This course may be taken for Academic Distinction Credit. See Academic Distinction Program in this catalog.

Prerequisite: Student must have a minimum of 20 semester hours in chemistry and consent of the Department Chair.

CHEM 4440. Instrumental Analytical Chem. 4 Hours.

Spectrophotometry, separation techniques and mass spectrometry are discussed. Specific topics include the computer's use in the modern laboratory, ultraviolet and visible absorption, atomic absorption, flame emission, and inductively coupled plasma spectroscopy, infrared absorption, and gas and liquid chromatography. Instruments for these techniques are used in the laboratory work. Four-hour laboratory. Fall.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2325 and CHEM 2401 and a minimum grade of C or concurrent enrollment in CHEM 4448.

CHEM 4441. Mthds-Envir/Industrl Analyses. 4 Hours.

This course covers the philosophy of modern instrumental methods used for environmental and industrial analyses. The topics to be covered include quality control and quality assurance good laboratory practices, waste minimization and elimination, safe laboratory operation, ISO standards, EPA methodology, and statistical data analysis. Spring.

Prerequisite: A minimum grade of C in CHEM 2401, CHEM 2323 and CHEM 2325, and CHEM 3368.

CHEM 4442. Air Quality. 4 Hours.

An in-depth study of the sources of air pollution is made. Sampling procedures and the chemical analyses required for identification of pollutants are studied. Control methods for the restriction of air pollution are outlined. Four-hour laboratory. Spring odd years.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2401, CHEM 2323 and CHEM 2325.

CHEM 4443. Structural Spectroscopic Methd. 4 Hours.

A survey of the spectroscopic and spectrometric methods for elucidation of structural information for chemical compounds with emphasis on the structural identification of unknowns. The methods of ultraviolet-visible spectrophotometry, Fourier-transform infrared spectroscopy, mass spectrometry, and both one- and two-dimensional nuclear magnetic resonance spectroscopy will be covered. Their relative strengths, complementary nature, and utility will be discussed. The focus will be the determination of chemical structures by spectroscopic/spectrometric methods. Spring even years.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125.

CHEM 4448. Physical Chemistry I. 4 Hours.

The foundations of thermodynamics and spectroscopic methods (radio-frequency, microwave, infrared, Raman, UV-visible, and X-ray) are developed from first principles with an atomistic point of view. Four-hour laboratory. Fall.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, MATH 1420, MATH 1430 and one year of physics.

CHEM 4449. Physical Chemistry II. 4 Hours.

The developments of thermochemistry, phase diagrams, equilibria, and kinetics are traced from the statistical mechanics of quantum states to the macroscopic observations of thermodynamics. Four-hour laboratory. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4448.
