

MASTER OF ARTS IN MATHEMATICS

The Master of Arts in Mathematics is a thirty-six hour, non-thesis program designed for those who desire to become curriculum specialists or who want to teach two-year college and/or dual-credit mathematics classes. Recipients of the MA degree are also prepared for admission to a doctoral program in mathematics education. The MA in Mathematics program is an online program; however, it can accommodate students who wish to take face-to-face courses.

Students who wish to work in industry, teach at the post-secondary level, or pursue doctoral studies in mathematics are encouraged to pursue the MS in Mathematics.

Applicants seeking admission to the graduate program in Mathematics must submit the following directly to the Office of Graduate Admissions:

- Graduate Application (<http://www.shsu.edu/admissions/apply-texas.html>)
- Application fee (<http://www.shsu.edu/dept/graduate-studies/application-fee.html>)
- Official transcript(s) of all previous college work
- Official GRE scores
- Two letters of recommendation

An overall undergraduate GPA of 3.0 or higher is preferred for admission into the Mathematics program. However, GPA and GRE scores are not sole criteria for admission. Based on a review of an applicant's undergraduate transcript, the Department of Mathematics and Statistics may require completion of undergraduate stem courses as a condition for admission. Required prerequisites include three semesters of calculus and one semester of linear algebra.

The degree requires a minimum of thirty-six hours of graduate credit. An oral comprehensive examination covering the four core M.A. courses is administered by the advisory committee for each degree candidate. The oral examination must be scheduled with the Graduate Advisor at least three weeks in advance. Students must be enrolled in the MA program during the semester in which they take the comprehensive examination. Requirements specified in the degree plan are subject to minor modification by the department. Also, to ensure a balanced program, all electives must be approved by the department chair or an authorized representative of the graduate Mathematics faculty.

Code	Title	Hours
Master of Arts in Mathematics		
Courses		
MATH 5380	Research Project In Math Edu	3
MATH 5386	Concepts in Modern Algebra	3
MATH 5387	Transformational Geometry	3
MATH 5388	Concepts in Analysis	3
MATH 5389	Concepts in Probability & Stat	3
Electives		
Select three graduate courses in MATH		9
Additional Coursework		
Select 12 hours of the following:		12
Graduate courses in a second teaching field ¹		
Graduate MATH courses		
Graduate STAT courses		
Combination of graduate credit in the following areas: Computer Science, Mathematics, Statistics, Secondary Education		
Total Hours		36

¹ Selections must be made in consultation with the Graduate Advisor.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The MA in Mathematics is designed to provide graduates with the following marketable skills:

- The ability to teach mathematics at the secondary and post-secondary levels.
- The ability to analyze quantities, magnitude, forms, and their relationships using symbolic logic and language.
- The ability to apply mathematics and statistics to the solution of general problems of interest.
