2 Bachelor of Science, Major in Chemistry/Chemical Engineering

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics), the one semester credit hour Core Curriculum requirement for Component Area IX (Component Area Option), and the Degree Specific requirement.

² CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the Major requirement.

Notes
A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, and CHEM 4448, and in all required Physics and Mathematics courses.

After 5 years of study (3 at Sam Houston State University and 2 at another school with a chemical engineering degree program), the student earns two bachelor's degrees. Completing the 3-year sequence at SHSU is not sufficient to earn a degree by itself.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Chemistry/Chemical Engineering is designed to provide graduates with the following marketable skills:

- Ability to work safely with standard chemicals in a chemistry laboratory.
- Ability to keep thorough and accurate records of chemistry experiments.
- Ability to write final research reports and orally present results of experiments.
- Ability to analyze and interpret experimental data, including spectrophotometric data.
- Ability to understand the use of the major methods of purification of chemical compounds, including chromatographic techniques
