The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Forensic Chemistry is designed to provide graduates with the following marketable skills:

- Ability to work safely with standard chemicals in a chemistry laboratory.
- Ability to keep thorough and accurate records of chemistry experiments.
- Ability to write final research reports and orally present results of experiments.
- Ability to analyze and interpret experimental data, including spectrophotometric data.
- Ability to understand the use of the major methods of purification of chemical compounds, including chromatographic techniques.
