The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Nursing (BSN) is designed to provide graduates with the following marketable skills:

- Lead in the provision of safe quality care using evidence-based practice.
- Collaborate with patients and members of the healthcare team to promote health and provide preventive care.
- Incorporate ethical principles and professional standards to provide quality care to diverse populations.
- Advocate for patients and the nursing profession while incorporating dynamic system practices, health policies, and global healthcare factors.
- Maintain confidentiality and protect patient rights utilizing technology and information management systems.
