The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The MA in Higher Education Administration is designed to provide graduates with the following marketable skills:

- Use and critique of appropriate theory to understand, support, and advocate student learning and development.
- Design and evaluate learning experiences for students based on knowledge of how student learning and learning opportunities are influenced by student characteristics and college environments.
- Develop leadership, organizational, and management practices that could be applied to assist institutions in accomplishing their missions.
- Conduct and design studies, produce evaluations, and reports on sound research studies, assessment studies, or program evaluation, all grounded in the appropriate literature.
- Apply assessment results to inform and improve professional practice and student learning.
- Design and evaluate effective interventions for individuals and groups in college and university settings.
