MASTER OF SCIENCE IN CHEMISTRY

The Master of Science in Chemistry is designed to train chemists for careers in business, industry, or academics. This degree is also appropriate for those students planning to continue their training in Ph.D. programs at other institutions.

Applicants seeking admission to the graduate program in chemistry must submit the following directly to the Office of Graduate Admissions (https://www.shsu.edu/dept/graduate-admissions/prospective-students.html):

1. Graduate Application (http://www.shsu.edu/admissions/apply-texas.html)
2. Application fee (http://www.shsu.edu/dept/graduate-studies/application-fee.html)
3. Official transcript(s) of all previous college work
4. Three letters of recommendation

Applicants must have a major or minor in chemistry (with at least a 2.5 GPA in their undergraduate chemistry courses typically including Analytical or Quantitative Chemistry, Instrumental Methods, one year of calculus-based Physical Chemistry, and Inorganic Chemistry) or commensurate industrial experience. While GRE scores are not required, they may be submitted with the application for consideration during application review.

For a final admissions decision, a holistic review of each student’s application file will be completed on a competitive basis. Currently a 3.0 GPA is required for financial support.

The Department of Chemistry (https://www.shsu.edu/academics/chemistry/) offers classes in a wide variety of chemical subjects including analytical, forensic, inorganic, organic, physical, and polymer chemistry, toxicology, and biochemistry.

¹ Usually taken every semester and receives a grade of "IP" until the final semester the research project is completed.
² Courses should be selected in consultation with the Graduate Advisor. The student may take CHEM 5100 two additional times for a total of three credit hours.
³ Once enrolled in CHEM 6099, the student must enroll in this course every semester until graduation.

Restricted Electives

Select one course from four of the following five areas:

- **Organic**
  - CHEM 5361 Physical Organic Chemistry
  - CHEM 5362 Organic Reaction Mechanisms

- **Analytical**
  - CHEM 5368 Analytical Spectroscopy

- **Biochemistry**
  - CHEM 5372 Advanced Biochemistry I
  - CHEM 5373 Drug and Toxin Biochemistry

- **Inorganic**
  - CHEM 5374 Chem of Coordination Compounds
  - CHEM 5375 Organometallic Chemistry

- **Physical**
  - CHEM 5381 Adv Physl Chem Thermodynamics
  - CHEM 5382 Symmetry and Spectrscopy

Electives

Select two graduate courses in CHEM

Secondary Field

Select four graduate courses in PHYS, BIOL, or MATH

Total Hours

1 CHEM 5100 must be taken three times for a total of three credit hours.

2 Courses should be selected in consultation with the Graduate Advisor.

Plan 4 - MS in Chemistry (Non-Thesis Option)

<td>Selected Topics in Adv Chem</td>
</tr>
</tbody>
</table>

Electives

Select six graduate courses in CHEM 18

Total Hours 36

1 CHEM 5100 must be taken three times for a total of three credit hours.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The MS in Chemistry is designed to provide graduates with the following marketable skills:

• Work safely with standard chemicals in a chemistry laboratory.
• Keep thorough and accurate records of chemistry experiments.
• Write final research reports and orally present results of experiments.
• Analyze and interpret experimental data, including spectrophotometric data.
• Understand the use of the major methods of purification of chemical compounds, including chromatographic techniques.
