HEALTH (HLTH)

HLTH 5097. Special Topics in Health. 3 Hours.

HLTH 5317. Case Studies in Occup Epidem. 3 Hours.
Students focus on epidemiology and its applications to healthcare facility quality and safety with an emphasis on the complex issues related to healthcare quality and safety, and the effects of policies on health quality and safety.
Prerequisite: Graduate Standing.

HLTH 5318. Current Topics in Env Health. 3 Hours.
Students focus on current environmental health issues that are fundamental in the field of public health. Students learn to apply and analyze the complex issues related to environmental health with a focus on research and policy implications.

HLTH 5331. Foundation of Community Hlth. 3 Hours.
Students apply the epidemiological, biostatistical methods of investigation o international, national, state, and local health issues. Additionally, the historical and philosophical foundations of community health are presented with an orientation to current health programs, medical care trends, and health problems experienced by diverse populations.

HLTH 5332. Human Ecology. 3 Hours.
Students study the major factors which determine health or illness, including how populations respond to various determinants of health including lifestyle, heredity, environment, and health care resources.

HLTH 5333. Colloq in Human Sexuality. 3 Hours.
Students study all of the factors influencing growth and development with a consideration of the special problems, including developing family life, sexuality issues, intimate relationships, and the cultural impact they have on society.

HLTH 5334. Colloq in Use & Abuse of Drugs. 3 Hours.
Students are presented a value education approach to the prevention of drug use and abuse is along with personal, family, community and school factors influencing drug use. The origins and derivations of drugs are explored. The mental, emotional, physical, social and physiological effects from the use of drugs are analyzed.

HLTH 5338. Colloq in Consumer Hlth Edu. 3 Hours.
Students study of consumer goods and services as related to the health of individuals, their families, and their communities. Marketing principles for health promotion and current health care bioethical issues are addressed.

HLTH 5355. Health Services Administration. 3 Hours.
Students are introduced to the domain of health care administration and management. Topics discussed in the course may include organizational theories, leadership strategies, human resource constructs, ethical issues, and marketing initiatives. The content of the course serves as a foundation to the graduate programs in Health.
Prerequisite: Graduate standing.

HLTH 5360. Comm Theory Prac Health Prof. 3 Hours.
Students engage in a laboratory experience built around research on motivational concepts as they influence changes, perception, attitudes, values and behavior. Diffusion patterns, group discussion, decision-making, and interviewing techniques will be covered. Attention is given to the selection, use, and evaluation of media, materials, visual aids, press, radio, mass media, etc.

HLTH 5361. Theoretical Foundations of Health Promotion. 3 Hours.
Students study the history, philosophy, and practices of Health Education. Exploration and application of behavioral science concepts and methodologies to community health education and in-service training of health professionals. Case studies and other practice models are used.

HLTH 5363. Management and Leadership for Health Professionals. 3 Hours.
This course is designed for the individual who will assume some type of supervisory position in health promotion or sports management. The course? s focal point involves exposure to administrative skills required of those who serve in a leadership capacity.

HLTH 5365. Aging and Health Promotion. 3 Hours.
Students engage in a discussion of health promotion issues for the elderly, including physical assessment, chronic care, health care maintenance, psychological adaptation, nutrition, and other current topics.

HLTH 5371. Health Care Quality & Safety. 3 Hours.
Students are introduced to foundational concepts in the domain of health care quality and safety. The fundamental topics discussed in the course may include the elements of patient safety and satisfaction, measures for improving organizational and patient quality, accountability standards, and the system approach for continuous improvement. The course is intended to be taken during the graduate student’s first year in the program.
Prerequisite: Graduate standing.

HLTH 5373. Risk Mgmt in Health Care Orgs. 3 Hours.
Students study the management and mitigation of risk in the health care environment. Topics may include process analysis using Failure Modes and Effects Analysis (FMEA), root cause analysis, and the reporting of data relating to risk management. The management constructs of monitoring and reporting, risk prevention, and communication strategies to minimize risk and injuries in the health care environment are also covered.
Prerequisite: Graduate standing, admission to the program, and HLTH 5371.
HLTH 5374. Research Seminar. 3 Hours.
Students study research techniques, identification of problems, research designs, and data gathering procedures. Students develop a proposal for a research project.

HLTH 5375. Statistical Design in Health. 3 Hours.
Students study the principles of advanced statistical techniques and measurement theory with emphasis upon their applications to Health, Kinesiology, and related areas.

HLTH 5377. Independent Studies. 3 Hours.
The student with specific interest and background experience in a specialized area will have the opportunity to apply theoretical concepts in a laboratory situation. The student may have practical experiences in a clinic, agency, special school or other types of institutions.
Prerequisite: Permission of the Graduate Coordinator.

HLTH 5378. Health Care Informatics. 3 Hours.
Students are provided an in-depth study of digital technologies in health information management systems. Topics discussed in the course may include approaches to data acquisition, storage systems, retrieval constructs, analysis of information, and technological use to provide information to drive decisions that address opportunities and problems in health care organizations.
Prerequisite: Graduate standing.

HLTH 5381. Health Economics and Finance. 3 Hours.
Students explore and analyze select financial management topics commonly used in nonprofit health care organizations including health care related economics principles, not-for-profit accounting statements, and financial project selection techniques. Credits: 3.

HLTH 5384. Quality and Safety Public Reporting Systems. 3 Hours.
Students focus on the quality and safety reporting requirements that foster continued improvement and financial efficiencies by making publicly available report cards and rankings of providers. Students access, manipulate, and create customized reports on health service delivery settings as requested by federal and state governmental entities and accreditation organizations. In addition, students prepare plans of action to manage public perception of report cards and to lead evidence-based organizational initiatives for improvement of quality and safety measures. Credit 3 hours.
Prerequisite: Graduate Standing.

HLTH 6098. Thesis I. 1-3 Hours.
This phase of the thesis investigation includes the completion of the review of the related literature, formulation of the research design and procedures and related pilot studies. Some data collection may also occur, and the thesis symposium must be completed to the satisfaction of the advisor and members of the thesis committee. Variable Credit (1 to 3).

HLTH 6099. Thesis II. 1-3 Hours.
This phase of the thesis work includes the completion of the data collection, as well as the actual writing and defense of the thesis. Variable Credit (1 to 3).

HLTH 6371. Advanced Concepts in Health Care Quality. 3 Hours.
In this advanced course in health care quality and safety, students use a systems approach to examine quality philosophies and frameworks with a focus on design, validation, quality measure applications, metrics for processes and outcomes, benchmarking concepts, strategic quality management, and the management of human factors.
Prerequisite: Graduate standing, 3 Hours of Statistics, and HLTH 5371.

HLTH 6373. Leading Change in Health Care Organizations. 3 Hours.
Students focus on advanced theoretical concepts and applications in the areas of leadership, organizational development, team building, change management, and the particular challenges involved with leading change in health care organizations. The effects of the culture of change initiatives are examined as well as approaches to motivating organizations to create more openness to the capacity of change through competent leadership.
Prerequisite: Graduate Standing.

HLTH 6384. Health Quality & Safety Capstone. 3 Hours.
This culminating course is designed to integrate all of the contextual material from the coursework included in the MS in Health Care Quality and Safety program. Emphasis is placed on the assimilation and application of health information, organizational processes, continuous improvement constructs, and operational and patient safety strategies. This course includes a student capstone project that focuses on assessment, planning, and evaluation about an emerging healthcare quality and safety issue.
Prerequisite: Graduate standing, admission to the program, completion of HLTH 5355, HLTH 5371, HLTH 5373, HLTH 5378, HLTH 5384, and HLTH 6373.

HLTH 6396. Health Prog Planning/Internship. 3 Hours.
Students engage in a comprehensive review of the components of health program planning with emphasis on the socio-economical, cultural, and political factors that influence the health status of a community. Emphasis is focused on a comprehensive approach to health program planning and behavior change models.

HLTH 6397. Internship. 3 Hours.
Students engage in a professional field experience conducted in an approved setting for health education within the medical community, workplace or school setting. The 300 hour practicum is facilitated under the supervision of a qualified health educator or approved preceptor.
