The Department of English offers students the opportunity to study language, literature, composition, and cultures.

**Mission**

The Department of English strives to provide students with opportunities to grow as learners and as individuals. Students in the English Program may, through study of literature, gain an awareness and knowledge of themselves and their contemporary world. English students may also combine their cultural interests with specific vocational objectives, such as professional writing, teaching, or pre-professional training for law, business, or medicine.

English forms the cornerstone of the humanities. In a variety of courses in literature, writing, and the English language, students find a source of personal enrichment, and they develop verbal, analytic, and cultural skills readily adaptable to a variety of careers.

English students learn to write with precision, to read and analyze texts with accuracy, to conduct research and organize a welter of materials, to speak and listen well — in short, to sharpen critical thinking and inquiry skills. These skills are highly valued by prospective employers. Most professions, while expecting new employees to be familiar with their specific fields, stress above all else the ability of their employees to read, write, think, and speak proficiently. Similarly, professional schools are interested in the student who reads, writes, thinks, and speaks well. Brochures from medical and law schools, for example, reflect an increasing awareness of the importance of an English background for future physicians and attorneys.

**Academic Programs**

Students in English may choose the Bachelor of Arts in English with an approved minor or may choose composite teacher certification in English, Language Arts, and Reading. Students may also opt to minor in English (with or without Secondary Education Certification), in Creative Writing, in Professional Writing, or in American Studies.
