

MINOR IN MEDICAL HUMANITIES AND SOCIAL SCIENCES

The Minor in Medical Humanities and Social Sciences provides students with an interdisciplinary curriculum that draws from the studies of rhetoric, literature, communication, philosophy, ethics, history, culture, psychology, political science, and sociology. Thus, the minor complements majors from all Humanities, Social Sciences, and Allied Health disciplines. It prioritizes student success and access by preparing them for advanced study or careers in medicine, healthcare policy or law, public health, social work, patient navigation and advocacy, healthcare administration, and health communication, among others.
