# Bachelor of Science, Major in Chemistry/Chemical Engineering

A Dual Degree Plan for Concurrent Bachelor of Science Degrees from Sam Houston State University and Universities with Recognized Accredited Chemical Engineering Degree Programs

In this plan, the student completes three years in Chemistry at Sam Houston State University and two years in Chemical Engineering at a university with a recognized accredited chemical engineering degree program. On successful completion of the curriculum shown below, and the chemical engineering curriculum at a university with a recognized accredited degree program in chemical engineering, the student will receive two Bachelor of Science degrees, a Bachelor of Science with a major in Chemistry from Sam Houston State University, and a Bachelor of Science in Chemical Engineering from the university with the recognized accredited chemical engineering degree program.

1. Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science).
2. Satisfies Core Curriculum requirement for Component Area I (Communications).
3. Satisfies Core Curriculum requirement for Component Area II (Mathematics).
5. CHEM 4440, CHEM 3367, and CHEM 4367 are recommended.
Notes

1. A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, and CHEM 4448, and in all required Physics and Mathematics courses.

2. After 5 years of study (3 at Sam Houston State University and 2 at another school with a chemical engineering degree program), the student earns two bachelor’s degrees. Completing the 3-year sequence at SHSU is not sufficient to earn a degree by itself.
