1 MATH 1420 requirement for Core Curriculum Component Area II (Mathematics) as well as one hour of Component Area IX (Component Area Option).
2 CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirements for Component Area III (Life and Physical Science) and the Degree Specific requirement.
32 hours, more if non-advanced prescribed electives are selected.
4 The following minors cannot be paired with this degree program: Minor in Chemistry.
5 A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000 and 4000-level courses. A minor in Biology, as a common example, requires 7 additional hours beyond BIOL 1406, BIOL 1407, CHEM 1411, CHEM 1412, and BIOL 3450 (which can be selected as prescribed elective).

## Notes

Students must earn a 2.0 minimum overall GPA in all coursework.
Students must meet a 2.0 minimum overall major GPA in all major coursework.
Students must earn a 2.0 minimum SHSU GPA in all coursework.
Students must meet a 2.0 minimum SHSU major GPA in all major coursework.
A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, and CHEM 4448, and in all required Physics and Mathematics courses.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Chemistry: Biochemistry and Medicine Concentration is designed to provide graduates with the following marketable skills:

- Work safely with standard chemicals in a chemistry or biochemistry laboratory.
- Keep thorough and accurate records of chemistry and biochemistry experiments.
- Write final research reports and orally present results of experiments.
- Analyze and interpret experimental data, including spectrophotometric data and kinetic data.
- Manipulate enzyme function for use in chemistry, biochemistry, or medicine.
