

UNDERGRADUATE CERTIFICATE IN SECURITY AND RESILIENCE IN THE HEALTHCARE SECTOR

The Undergraduate Certificate in Security and Resilience in the Healthcare Sector is designed to educate students working in, or seeking careers in, areas relating to security and resilience of infrastructures in the healthcare and public health sectors. The undergraduate certificate covers all aspects of the homeland security cycle—from protection, prevention, and mitigation to response and recovery—as they relate to the public health sector as a component of critical infrastructure.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The Undergraduate Certificate in Security and Resilience in the Healthcare Sector is designed to provide graduates with the following marketable skills:

- Risk Assessment.
- Emergency Management.
- Healthcare Sector Security and Resilience.
