## **BACHELOR OF SCIENCE, MAJOR IN ANIMAL SCIENCE**

The major emphasis in Animal Science prepares students for careers in the livestock and equine production and support industries. Scientific principles, management, production technologies, and skills are covered in appropriate courses. The University maintains herds and flocks for teaching and research. Students may complete pre-veterinary medicine, equine science, wildlife management and conservation biology requirements under the Animal Science program. Graduates can expect to qualify for positions in sales and service, inspection, regulation, research/teaching, breed associations, extension, or management in an animal, equine and/or wildlife management industry.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Animal Science is designed to provide graduates with the following marketable skills:

- Ability to make livestock management decisions based on scientific, economic, and other applicable information.
- · Knowledge of each segment of the food animal and meat industry and make critical marketing decisions in each.

- 4 Bachelor of Science, Major in Animal Science
  - Understand nutrition as it applies to animal performance and be able to develop balanced rations to meet physiological and production needs.
  - Develop presentations and effectively communicate factual information, logically and concisely, both orally and in writing.
  - Understand anatomy, physiology, and functions of the major organs and systems of livestock.
