

BACHELOR OF SCIENCE, MAJOR IN PHYSICS, MECHANICAL ENGINEERING 2+2

| Code | Title | Hours |
|--|---|-----------|
| Bachelor of Science, Major in Physics, Mechanical Engineering 2+2 | | |
| Core Curriculum | | |
| | Component Area I (Communication) | 6 |
| | Component Area II (Mathematics) ¹ | 3 |
| | Component Area III (Life and Physical Science) ² | 8 |
| | Component Area IV (Language, Philosophy, and Culture) | 3 |
| | Component Area V (Creative Arts) | 3 |
| | Component Area VI (U.S. History) | 6 |
| | Component Area VII (Political Science/Government) | 6 |
| | Component Area VIII (Social and Behavioral Sciences) | 3 |
| | Component Area IX (Component Area Option) | 4 |
| Degree Specific Requirements | | |
| CHEM 1411 | General Chemistry I ² | 4 |
| CHEM 1412 | General Chemistry II ² | 4 |
| MATH 1420 | Calculus I ¹ | 4 |
| MATH 1430 | Calculus II | 4 |
| PHYS 1401 | Physics Boot Camp | 4 |
| PHYS 1411 | Introduction To Physics I | 4 |
| PHYS 1422 | Introduction To Physics II | 4 |
| Major: Foundation | | |
| MATH 3376 | Differential Equations | 3 |
| PHYS 3115 | Electronic & Circuit Anlys Lab | 1 |
| PHYS 3360 | Statics And Dynamics | 3 |
| PHYS 3395 | Electronics & Circuit Analysis | 3 |
| Major: Concentration | | |
| COSC 1436 | Programming Fundamentals I | 4 |
| ETDD 1361 | Engineering Graphics | 3 |
| ETEC 1010 | Engineering Foundations | 2 |
| MATH 2440 | Calculus III | 4 |
| Total Hours | | 81 |

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour for Component Area IX (Component Area IX) as well as the major.

² Satisfies the Core Curriculum requirement for Component Area III (Life and Physical Science) as well as the major.

While SHSU does not offer degrees in Engineering, the Department of Physics and Astronomy does provide several options for Pre-Engineering. Physics and Engineering go together very well, because so much of Engineering Design is built upon the underlying foundation of Physics.

Students on the Mechanical Pre-Engineering plan complete 81 credit hours in residence at Sam Houston State University, focusing on the Core Curriculum and developing a firm foundation in math and the hard sciences. They then transfer to a partner institution to complete remaining requirements for award of a degree in Mechanical Engineering. Our academic articulation agreement with the University of Texas at Tyler (UT-Tyler) makes the transfer of matching credit a seamless process and guarantees acceptance for students meeting GPA requirements. However, students are also free to continue their study at any institution with an accredited Engineering program.

For students considering Pre-Engineering vs. Engineering Technology, it is very important to understand the similarities and differences between these programs. Engineering tracks include significantly more Math (especially Calculus) than Technology tracks do, leading to very different careers. The Accreditation Board for Engineering and Technology (ABET) says that Engineering programs often focus on theory and conceptual design, while Technology programs usually focus on application and implementation. Engineers often do work involving original research and development, and many continue on to Masters or Doctoral programs in Engineering. Technologists are most likely to work in construction, manufacturing, product

design, testing, or technical services and sales. Students interested in Engineering are supervised by the Department of Physics and Astronomy. Students interested in Technology are supervised by the Department of Engineering Technology.

Students may also wish to consider the Physics and Engineering Dual Degree, or "3+2" program, where students earn Bachelors Degrees in both Physics and Engineering. This starts with three years at SHSU, completing the Core Curriculum, the Calculus and Physics introductory sequence, and a portion of the upper division Physics Curriculum. Students then transfer to UT Tyler or apply for acceptance to any accredited Engineering program of their choice for the last two years of degree work. After completion of the Engineering Degree, credits are retroactively transferred back to SHSU so that the Physics Degree can be awarded simultaneously.

All students interested in Physics or Pre-Engineering enroll in the Physics Bootcamp (PHYS 1401) during their first semester on campus. This ensures that students master the math skills required during the next two years and helps them understand what those skills are good for in Physics and Engineering. It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.
