The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Environmental Science (Sustainability) is designed to provide graduates with the following marketable skills:

- · Use the scientific method to address environmental problems.
- · Think critically.
- · Generate and/or interpret geospatial data based geographic information systems (GIS) and/or remote sensing.
- · Apply knowledge of the environment and ecosystems to address environmental issues.
- · Interpret environmental policy to work within existing regulations.
- Interdisciplinary problem solvers that can integrate Biology, Chemistry, Geoscience, and social science.
