## MASTER OF HEALTH ADMINISTRATION

A Master of Health Administration (MHA) degree enables students and professionals to advance their careers and take on leadership roles in healthcare delivery and financing organizations. These leaders plan, direct, and coordinate services in a wide variety of care delivery settings. The program blends coursework in healthcare management, policy, and business principles, providing a comprehensive education that equips graduates to navigate the complex and evolving healthcare landscape. Career outcomes include healthcare executive, health services manager, and policy and advocacy specialist, among others.

Note: This proposed degree program is pending action from the Texas Higher Education Coordinating Board.

Students must meet the following requirements for admittance to the Master of Heath Administration (MHA) degree program:

- 1. A student can be admitted to the program with a BA/BS in any field with an earned GPA of 3.0.
- 2. There are no prerequisite courses required for admission to the program.
- 3. The GRE/GMAT is not required for admission to the program.
- 4. Students must submit:
  - · Official undergraduate and graduate transcripts.
  - · Written essay including a statement of interest in the program and in the field of health administration.
  - · Interview with MHA Graduate Coordinator, graduate administrative associate, and member(s) of graduate faculty.
  - Two to three letters of recommendation from previous employer, faculty/administrator that are written on organization/school letterhead.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

## 2 Master of Health Administration

The Master of Health Administration is designed to provide graduates with the following marketable skills:

- Through their education, students will learn appropriate and professional ways in which to be able to communicate effectively with stakeholders in explaining health policies and procedures.
- Students will have well-developed sets of problem-solving skills which will enable them to effectively respond to the changes and fast-paced health environment.
- Students will be prepared to serve in healthcare leadership positions through a variety of professional development experiences and activities in their coursework.
- Students will have the knowledge and skills to effectively interpret and communicate health data to improve health-related policies and procedures.
- Students will acquire the skills to strategically analyze the organization, structure, and function of healthcare entities, public health functions, and regulatory systems in the state, national, and global environments.
