BACHELOR OF SCIENCE, DOUBLE MAJOR IN EDUCATION AND COMPOSITE SCIENCE

This degree is comprised of coursework from several disciplines; therefore, it will enable you to teach Biology, Chemistry, Geography and Geology (i.e., Earth Science), and Physics (including astronomy). Because individuals who have this certification can teach several disciplines of science, *they are especially sought after by schools*. This degree combines the core science coursework with that required for the Secondary Education certification. It also allows students to focus in an area of science that interests them by choosing designated electives within the focus area. Accordingly, after having completed the common core of science classes, students then focus their remaining coursework in an area of particular interest to them, such as chemistry or geology. Because this degree encompasses several science certifications, it requires 130-133 hours of coursework, depending upon the area of specialization. Below is a summary of the Composite Science degree requirements.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS with a Double Major in Education and Composite Science is designed to provide graduates with the following marketable skills:

- Prepared to teach Biology, Physics, Chemistry, Earth Science and Astronomy content for Texas teacher certification.
- Prepared to implement evidence-based methods of teaching and learning.
- Fully qualified to teach in Texas public high schools
