

BACHELOR OF SCIENCE, MAJOR IN INTEGRATED STUDIES: ENVIRONMENTAL AND OCCUPATIONAL HEALTH CONCENTRATION

The BS in Integrated Studies: Environmental and Occupational Health Concentration combines Environmental, Health, and Safety Management, Environmental Studies, and Health minors to meet emerging industry demands by critically analyzing issues from multiple perspectives, identifying problems, and developing innovative solutions. Students develop versatile and in-demand skills for consulting and project management roles while gaining expertise in environmental issues and public health. Graduates will be ready for careers in manufacturing, construction, environmental consulting, and any industry where workplace safety and compliance are a priority, and in sectors focused on environmental conservation, public health, healthcare management, and policymaking.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Integrated Studies: Environmental and Occupational Health Concentration is designed to provide graduates with the following marketable skills:

- Integration of diverse fields and perspectives.
- Innovative problem-solving abilities.
- Flexibility and adaptability.
- Regulatory compliance and safety program management.
- Environmental and public health systems design.
- Risk assessment and sustainability planning.
